WOKIPI

World Kite Picture, the main theme
of our trip around the world.

The project

This project, the desire to go around the world for several years, is not new. It began to form in our mind since twenty years. The idea has gained ground, we have matured and our projects too. Now we have more experience in all areas that serve us throughout our journey : kites, solar balloons, Aerial photography and especially the sharing and contacts with our « landmates »

The Aerial photography by kite or solar balloon is to embark on a rig a radio-controlled camera. This rig can be oriented 360 ° horizontally and 0 to 90 ° vertically. The trigger shooting is done by radio control.

A display of framing perhaps done remotely by a video transmitter. Altitude Shooting is an average of 150m.

Apart the "classics" photographs of travel that we will certainly do, our aerial photography will be made from kites or solar balloons, depending on weather conditions.

Our kites and balloons will serve as a way to go and meet children. Curious by nature, it is enough to get our "**flying machines**" for joining us. We use a system of dual control, for example, to enable **them** to fly our own kites.

Thus, throughout our trip we follow the thread of our kites and solar balloons.

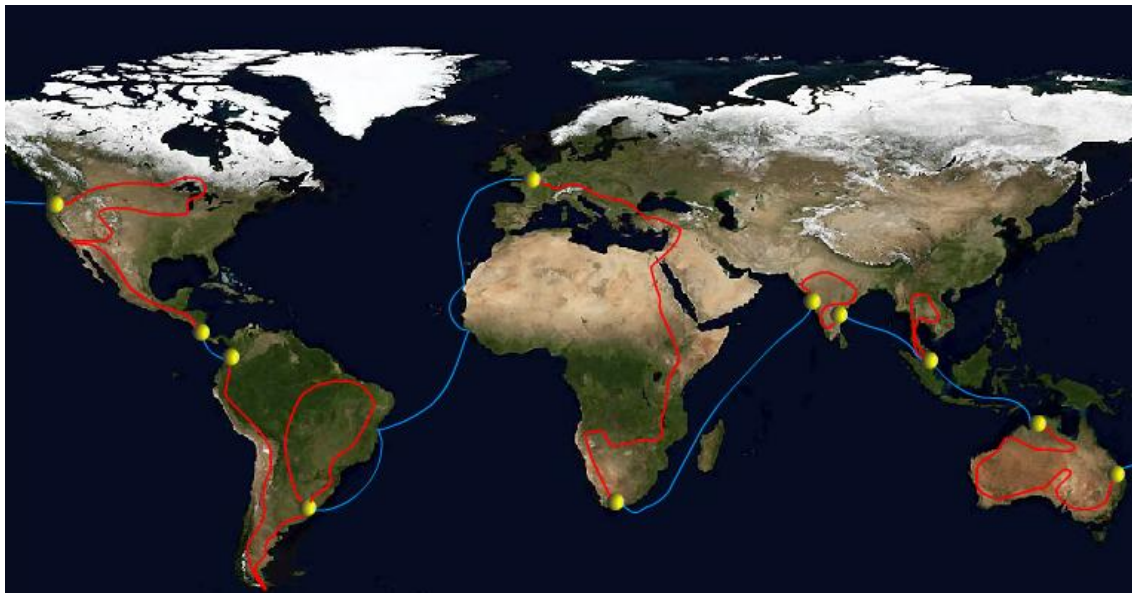

WOKIPI

Association

Wokipi is a Non-profit organization (Official Gazette of October 24, 2009) and thus has a real status and greater credibility for the research partners. Because, become legal person with legal capacity, the association Wokipi may receive different funding for its operations, grants, donations and aid from the partnership or sponsorship ...

The Wokipi objective is the promotion, practice and development of the video or the aerial photography by kite and solar balloon in all its forms, through a world tour over five continents. The choice of the environmentally responsible approach is to use a technology non-polluting, quiet and environmentally friendly.

Travel

The preparation of a world tour is already part of the trip. It allows interest in geography, politics, climate, history of the country we will cross. Climate and departure date will guide us in choosing the countries visited. Setting off at the end of 2010, the direction will be South America, particularly Argentina.

The itinerary we will really do will certainly be modified according to our meetings, opportunities to go somewhere or other region. We must also adapt to climate, geo-political conditions ..

WOKIPI

Web site : www.wokipi.com

The pages of this site wokipi.com not devoted solely to Travel, whose departure is scheduled for late 2010.

We wanted to immerse yourself in **our world**, to discover the world of kites and balloons and talk you a little about us through them.

We were surprised by the **variety of kites** around the world, by design (materials, shapes ..) and their symbolism. Our friends kite flyers of "Bout du Monde" showed us through their stories, legends and traditions of kite flying in their country. We want to share their stories with you waiting our own experience during our trip.

On our website you will also discover the history of hot air balloons. From first experiments flights balloons paper in 1709 to study the solar balloon by NASA ...

What progress!

WOKIPI, une autre façon de photographier le Monde par Aérophotographie

Notre Tour du Monde "Wokipi"... C'est quoi ?

C'est avant tout l'envie de réunir nos passions et de les partager ensemble : le voyage et la rencontre des autres, la photographie, l'aérophotographie par cerfs-volants et ballons, technologie non-polluante, silencieuse et respectueuse de l'environnement, au travers un voyage de plusieurs années autour du monde.

Départ prévu fin 2010, notre projet itinéraire est dans la rubrique : [Voyages](#).

Voilà, Wokipi c'est tout cela à la fois : World Kite Picture sera le fil conducteur de notre voyage autour du monde. [En savoir plus](#).

Découverte

Tradition du cerf-volant

Plus qu'un jouet de plage pour les enfants, le cerf-volant est dans de nombreux pays une véritable tradition, qui accompagne la vie quotidienne et les grands événements.

Découverte des ballons

Ils volent grâce à l'air chaud. Des premiers expériences de vols des ballons de papier en 1709 aux études sur le ballon solaire par la Nasa ... Que de chemin parcouru !

Histoire de l'aérophotographie

La Terre vue du Ciel... Bien avant l'avènement des machines volantes, des hommes ont réussi de magnifiques et surprenantes prises de vues aériennes de notre belle planète.

L'équipe

Patrick et Patricia

Cà c'est nous deux ... Différents mais complémentaires, nous formons une véritable équipe. Notre devise : S'aimer, ... c'est regarder ensemble dans la même direction.

Woki, notre Toyota

C'est le plus jeune de l'équipe ! 2009 aura surtout été consacrée à son immatriculation en France et sa transformation en Allemagne. Il va falloir maintenant l'apprivoiser.

Partenaires

Faites partie de l'équipe en devenant partenaire. Venez nous rejoindre et vous ne pourrez qu'être séduit par ce projet.

Nos expériences

Cerf-volant et Ballon

Cerf-volistes depuis 1991, nous avons créé Carnet de Vol en 1998. Nous participons aux festivals, organisons des ateliers, des expositions et des manifestations aériennes.

Voyages

Nous sommes partis sur les routes en étant autonomes. Mais un véritable regret à chaque fois que de quitter des lieux, des personnes faute de temps... Nous allons y remédier !

Nos Toyota

Fidèles, nous le sommes aussi avec nos Land Cruiser Toyota. Nous apprécions leur fiabilité. Un hasard, en 1951, naissance du Land Cruiser et de Patrick ! Un peu d'histoire sur les Toyota.

WOKIPI

Team

We are three for this fabulous project.

Patrick et Patricia ... different but complementary, we are a real team.

Woki, our Toyota ... It's the youngest of the team!

Patrick : Photographer Audiovisual Manager in a large group, he turned to the business of journalist and Project Manager Media (website).

Patricia : Dietician, head of a service consumer in the food industry for children, trained as a Multimedia Project Manager (website)

Woki : A Toyota Land-Cruiser, reliable, robust, high-performance, with a solid reputation for longevity. We did transform and develop in Germany, a specialist of the Toyota: Desert-tec. Equipped to live on board few years with our kites and solar balloons, it will be our faithful companion.

PARTNERSHIP

Why ?

A **World Tour** is funded first and foremost through his personal savings!

However, we are not against aid that would bring us prospective partners who wish to support this project or encourage original adventure.

How ?

What you can give in the project WOKIPI

- Financial support (sponsorship)
- Material assistance (equipment, kite, balloon, navigation, satellite communication)
- Help logistics (shipping, parts support ...)
- media relay (publications of internal or external articles)

Your ROI

ROI (return on investment) and brand are inseparable. Being cost effective and efficient are essential keys to the business logic. But it is easily measured in euros return on investment, what about when we talk about brand image and reputation?

Therefore Wolipi offers:

- Your logo and description of your company's website Wokipi
- Depending on your partnership, can have your logo on our vehicle
- Photographs selected for your internal / external communication
- Impact Media (quotation from our partnership in publication or interview)

Your support is precious

Each proposal will be studied with greater attention
